LEARN MORE

“Quality through Experience”

Created in 2020, Plugin Power Energy Ltd has been setup to pro-actively provide solutions to emerging challenges related to electric mobility, heat pumps and other energy systems.

For several decades, we have been providing IT consultancy and security services for many major brands.

Emerging smart energy challenges require relevant technological solutions. With industry leaders, we are creating a great experience for everyone involved with electric mobility, Mobility as a Service and sustainable energy systems.

Global challenges call for international collaboration and solutions
Together, we will deliver Electric Vehicle infrastructure ready for mass adoption

Integrity – Security – Safeguarding - Accessibility
