

# Grid Engagement

---

(PLACEHOLDER  
CONTENT)

## (National Grid Perspective)

Early engagement of Power Grid operators is vital to success.

- **Dependant on your proposed hub location, you can engage directly with National Grid?**
  - National Grid and partners offer the ability to connect directly to their “backbone” network, by-passing the regional DSO network. This can prove more timely and cost-effective.
- (ref Oxford) A large scale hub site may require a High Voltage feed of c.25 megawatt
